

Naman Sood

mail@nsood.in | www.nsood.in | linkedin.com/in/namansood | github.com/tendstofortytwo

SKILLS

Languages JavaScript, Go, Rust, C++, C, Python, Scala, HTML/CSS, Shell, Haskell
Technologies Git, Docker, Kubernetes, AWS EC2/S3, gRPC/Protobuf, React, SQL, MongoDB

EXPERIENCE

data.world

Software Engineering Intern – Austin, TX

May 2022 – Present

Carta

Software Engineering Intern, Infrastructure – Kitchener, ON

Sep 2021 – Dec 2021

- Designed distributed gRPC logging system using Apache Fluent for **scalable auditing and compliance** across organization.
- Created proof-of-concept for logging system using Kubernetes DaemonSets, with ConfigMaps to deploy custom configurations.
- Enforced standardization of Protobuf definitions for **over 300 microservices** by designing static analysis tool in Go.
- **Optimized build times by 10x** for Docker images by simplifying package requirements to allow precompiled dependencies.
- Improved system availability by identifying and removing bottlenecks in Redis server connections in Python library.

Tailscale

Software Engineering Intern – Toronto, ON

Jan 2021 – Apr 2021

- **Introduced cloud/serverless support** by providing userspace TCP/IP emulation for LXC containers, using Google gVisor.
- Enabled standardized communication using SOCKS5 protocol over Tailscale VPN by implementing proxy server in Go.
- **Simplified deployments in cloud environments** by creating single-session authentication keys with auto-cleanup.
- Enabled clients to **secure CI/CD pipelines** by creating a GitHub Action ([link](#)) that allows workflows to use Tailscale VPN.
- Expanded outreach within the technical community by writing long-form content for corporate blog ([link](#)).

University of Waterloo

Research Associate – Waterloo, ON

May 2020 – Aug 2020

- Optimized Go consensus system to **3x throughput** by increasing maximum transaction count sent in each message.
- Streamlined deployment of project by using Docker images to generate repeatable builds across diverse environments.
- Unified similar codebases by migrating duplicate components to a single C++ project.
- Assisted distributed systems research by conducting experiments on AWS EC2 and analyzing performance data in gnuplot.

Creesync Software

Software Engineering Intern – New Delhi, India

May 2019 – Aug 2019

- Simplified distribution of professionally clicked photos by building Electron and React Native apps.
- Designed and deployed API to upload and preview photos in low-bandwidth situations using NodeJS and AWS S3.

The Girl Code

Volunteer Full Stack Developer – New Delhi, India

Mar 2018 – Apr 2020

- Developed online platform to interactively teach programming in **10+ workshops across 3 countries** using NodeJS.

PROJECTS

CHIP8-rust ([link](#)) Rust

Emulator for CHIP-8 microprocessor. Simulated behavior of machine instructions with Rust, created graphics in framebuffer.

Clay ([link](#)) C, x86 Assembly

A minimal x86 operating system. Handled tasks like interrupts, timers, paging, while balancing performance and maintainability.

cmdmap ([link](#)) NodeJS

Node module to map CLI programs to a JSON API. Designed abstraction over standard library features for improved security.

EDUCATION

University of Waterloo

Bachelor of Computer Science – 3.92 GPA

Sep 2019 – Apr 2024

- **Relevant Coursework:** Operating Systems, Applied Cryptography, Principles of Programming Languages
